

## Mental Health Issues

The Principal and the Director are available to support students in a professional and confidential manner with any personal problems that might arise while they are studying with us. If necessary, we put them in contact with a local GP. We are, however, unable to accept students with significant mental health issues. Students or their parents/guardians or sponsors must inform us (before enrolling) about any history of mental health problems so that we can advise whether our courses are suitable for them. If we become aware of serious issues after a student arrives, we contact their parents, sponsor and/or agent and inform them that we are not equipped to deal with such cases and that they should make arrangements for them to leave the school and get the care and support that they need.
